

STOVETOP FIRESTOP[®] RANGEHOOD

“The Original” automatic fire suppressor – StoveTop FireStop Rangehood has been protecting residential kitchens from the devastating effects of cooking fires since 1972.

One pair of Rangehood canisters will protect a typical four burner stove from grease fires, even when no one is in the kitchen. Rangehood deploys automatically when the flame from a cooking fire comes in direct, sustained contact with the fuse on the underside of the canister.

STOVETOP FIRESTOP[®]

- Deploys automatically when the flame from a cooking fire comes in direct, sustained contact with the fuse
- Automatic suppression
- One pair protects a typical residential, 4-burner stove
- Simple, magnet-based installation
- 6-year effective life
- Original design
- For residential, indoor kitchens
- No maintenance or inspections needed
- Could potentially save on property insurance premiums, on average 2-7%

ADHESIVE MOUNTING KIT

Mounting Kit for non-magnetic surfaces over the stove.

One night back in 1972, our company’s founders were attending a neighborhood block party when they overheard someone talking about a recent grease fire. The neighbor stated, “I got distracted and left the stove on. Sure, I had a fire extinguisher and baking soda in the fridge. But since I wasn’t in the kitchen to use them, neither did me any good!” Hearing this story became a revelation, and launched the design of the simple, automatic fire suppressor that is today known as StoveTop FireStop.

PROVIDING SIMPLE,
AUTOMATIC COOKING
FIRE SUPPRESSION IS
SOMETHING WE TAKE VERY
SERIOUSLY.

StoveTop FireStop has protected individuals and families from the deadly effects of cooking fires since 1972, and we want to do the same for you and your family.

Originally founded in 1963 by Bob and Della Williams, the company now known as WilliamsRDM has a knack for solving complex problems with simple solutions.
